Sealite USA Exhibits in New Hampshire for 2022 NASBLA Annual Conference

Tilton, New Hampshire, USA – September 6, 2022 – The National Association of State Boating Law Administrators (NASBLA) 63rd Annual Conference is hosted in Sealite USA's home state of New Hampshire. Sealite USA will be present at this year's event from September 27-30, 2022 at the DoubleTree by Hilton in Downtown Manchester.

You will find Sealite's rotationally molded small marker buoy line:

- 9 Inch Regulatory Buoys (SL-B1060)
- Float Collar Regulatory Buoy (SL-B700)
- 18x30 Inch Barrier Float (SL-BF1830)
- 18 Inch Mooring Buoy (SL-MB-18)

Sealite will also have the following solar marine lanterns displayed to complete any aids to navigation (AtoN) solution:

- 1-2NM Solar Marine Lantern (SL-15)
- 2-3NM Solar Marine Lantern (SL-60)
- 2-3NM Solar Marine Lantern (SL-70)

The rotational mold process uses UV-stabilized polyethylene allowing each buoy to be a one-piece construction that is highly durable and damage resistant. The regulatory buoys come with regulatory or custom graphics, which will withstand heavy UV exposure without peeling and fading. For added visibility, Sealite's small buoys can be fitted with compatible solar marine lanterns.

Join the Sealite USA team at Booth #15 to see our range of marine products available for the inland waterway market. Bassim Oshiba, the Marine Sales Manager will be available to answer questions along with Jason Wernig, Account Manager for North America Marine, and Cathy Sonnentag, Business Development Manager for USA, State & Federal Accounts.

The team looks forward to seeing you at the show. [Contact us](#) to schedule a time to meet with our friendly team of experts!
