Join Sealite USA at The Docks Expo 2022

Tilton, New Hampshire, USA – November 8, 2022 – The Marina Dock Age, a marina and boatyard management publication of over 25 years, hosts an annual conference to connect marina professionals, federal and state government agencies, manufacturers, distributors, and suppliers of marine products, and other professionals in the marine industry for education seminars and networking. This year, The Docks Expo is held at the Music City Center in Nashville, Tennessee from December 6-8, 2022.

Sealite USA will be exhibiting at Booth #802 with their rotationally molded buoys and solar marine lanterns in tow:

- 9 Inch Regulatory Buoys (SL-B1060)
- Float Collar Regulatory Buoy (SL-B700)
- 18x30 Inch Barrier Float (SL-BF1830)
- 18 Inch Mooring Buoy (SL-MB-18)
- 1-2NM Solar Marine Lantern (SL-15)
- 2-3NM Solar Marine Lantern (SL-60)
- 2-3NM Solar Marine Lantern (SL-70)

Sealite's seamless, rotationally molded buoys remain vibrant over their lifetime. Solar marine lanterns with optional GPS synchronization allow two or more units to flash in unison to improve visual recognition of boundaries or marine channels and increase the visibility and safety of mariners.

Join Cathy Sonnentag, Business Development Manager for USA, State & Federal Accounts, at Booth #802, and get hands-on with durable, one-piece buoys and a range of lanterns for the inland waterways.
